AMP Sport

Improves Communication

Improves Preparation

Improves Performance
Overview

Developed in conjunction with the High Performance Department at the U.S. Ski Team and other elite partners, AMP Sport has emerged as the premier athlete management platform in the world.

Designed to enhance the preparation and performance of elite athletes, AMP Sport improves communication, promotes collaboration and helps teams manage more effectively. AMP Sport allows teams to easily design practice sessions and workouts, monitor team progress and provide valuable feedback to athletes.

For ski clubs in the U.S. , AMP Sport would provide the ability to easily communicate with all members of the team, collect and analyze data, share resources and identify future talent. Coaches and athletes will have access to training, wellness and skill development information anywhere in the world.

AMP Sport and AMP Skills

AMP Sport

- Designed to enhance the preparation and performance of elite athletes

- Improves communication and collaboration at all levels of a sports organization

- Streamlines data collection and analysis to make data points actionable

AMP Skills

- Standardizes skills evaluations by age group allowing organizations to effectively identify and develop future talent

- Evaluate overall skill development trends and review and update LTAD models

- Manages skill evaluations, track athletic developments and reward progress
- Gives immediate feedback

Benefits

Saves time

Optimized for mobile devices

Highly customizable

Saves money

Cloud-based software

Extremely secure

AMP Sport
